

## Developed from real life experience, itControl Suite is an automated system that simplifies the management and service of computing environments.

Today's network systems are increasing in complexity, causing more pain and labor to manage. itControl Suite takes the chaos out of computing system service and manages risks that can increase service requirements and interrupt end users computing functions.

Designed for corporate IT departments and IT Service Providers, itControl Suite works with single or multiple locations and helps both IT managers and technicians.

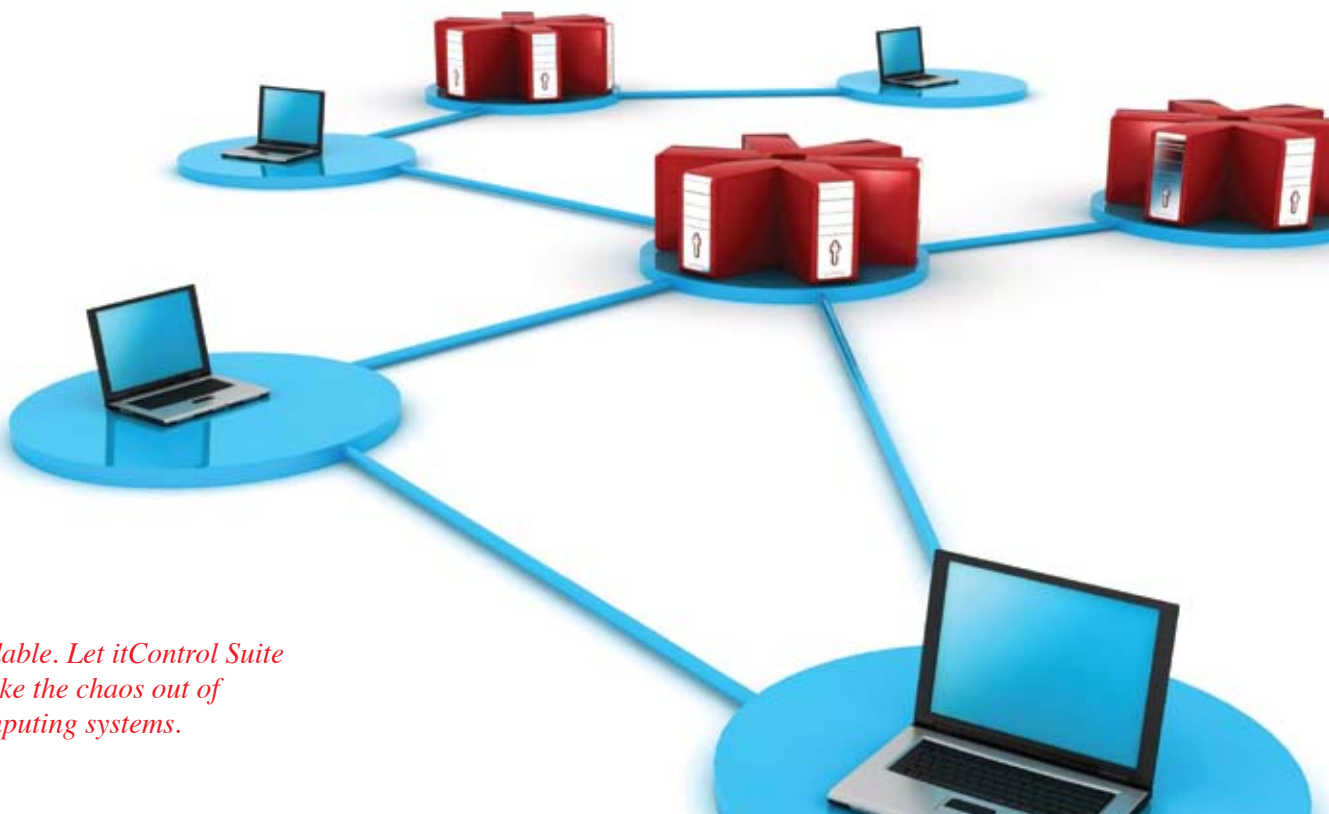

Having itControl Suite's features and functions consolidated into one affordable, cohesive system sets us apart. You can eliminate the expensive proliferation of software and utilities deployed to manage your computing systems.

itControl Suite is hardware appliance based so installation of the system takes less than 20 minutes. It's that simple and there is NO software, agents, nodes, probes or servers to install or manage.

With its "hands off" technology, itControl Suite is your silent partner, working in the background 24 hours a day, 7 days a week, so you don't have to.

## Through advanced technology, itControl Suite will:

- Use its **appliance based hardware** system to automatically interrogate your network environment to find problems and potential issues.
- Not require expensive infrastructure.
- Provide tools to fix network, workstation and server issues.
- Generate significant system reporting, analysis and key performance indicators.
- Reduce risk to protect your system.
- Simplify management and service.
- Increase uptime through pro-active service.
- Be active 24 hours a day, 7 days a week.
- Requires no labor to maintain.

*Fast – easy – affordable. Let itControl Suite work for you and take the chaos out of managing your computing systems.*

Extensive, ongoing system audits run invisibly, 24/7 to inform you of any service requirements. itControl Suite audits tell you how the system is behaving and provides you with live, instant detailed information about countless aspects of your systems.

- Function and threshold alerts to inform key service stakeholders
- Automatic key performance indicators and system measures
- Harvesting and automated analysis of all system data and logs
- Complete device inventory and asset management
- License compliance information
- Compliance tools for printing, software, USB devices and Internet browsing
- Automatic change management information

Staying on top of ongoing security threats requires automated tools. itControl Suite provides a set of functions specifically designed to manage system security pro-actively.

- World wide secure access and use of the system
- Live threat analysis and alerts
- Ongoing security vulnerability testing
- Penetration testing for security threats
- Built in patch and anti-virus management
- Backup status and reporting

itControl Suite begins by providing information about your computing system. Built in tools take the frustration out of delivering service and support. Always at the ready, itControl Suite lets you focus on fixing and preventing problems and performing routine maintenance.

- Work remotely from anywhere in the world
- One click secure remote access to any device
- Full visual information for any device, instantly
- Manage workstation and server services remotely
- Work with the problem, not the symptom
- Valuable tools to help you solve problems
- Control and standardize system elements easily

## Painless Installation

itControl Suite's appliance based system does NOT require any software, servers, agents, nodes or probes so you can be up and running in less than 20 minutes. Its hosted system is instantly ready for you to use securely from anywhere in the world.

## Service & Support Tools

With ongoing interrogation of all system elements, itControl Suite discovers problems while dispatching its tool set to allow you to service and support your network environments onsite or remotely.

## IT Management Made Simple

Proven to reduce service and support labor, our customers tell us that itControl Suite provides them with a collection of tools and capabilities that are costly and difficult to maintain on their own.
